ABOUT THE WEBINAR

Join John Aspinall and Steve Williams as they detail the Hanson approach to CoR. What responsibilities does a company, its employees, its managers, its directors, its contractors, its suppliers and its customers have? How can those responsibilities be met? When do those responsibilities have to be met? John and Steve will detail how Hanson rolled out a CoR training program across all operations in NSW covering all employees and contracted drivers. John will also detail how Hanson is helping our sub-contractors and customers to understand and comply with CoR.

Hanson is a leading producer of construction aggregates, pre mixed concrete and precast concrete. The Hanson group in Australia includes the Hanson and Hymix brands. Hanson is part of the HeidelbergCement group, which employs 57,000 people across five continents. HeidelbergCement is a global leader in aggregates and has leading positions in cement, concrete and heavy building products.

CASE STUDY

The NRSPP case study which this webinar is based on can be found at [Hanson - Handsome return for Hanson's proactive safety approach](#)
