

**PARTNERSHIP
PROGRAM**

**SPEED
QUICK FACTS**

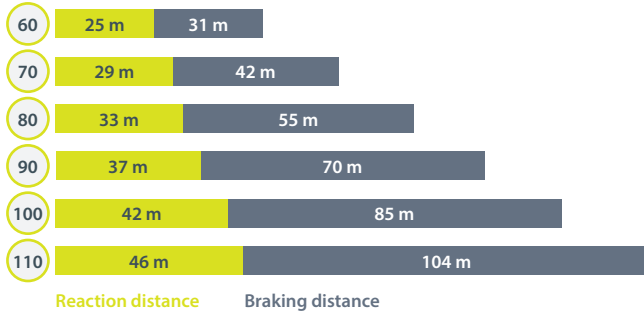

Increase in speed, is it really worth it?

A 5km/h increase in a 60km/h zone doubles your risk of being in a casualty crash.

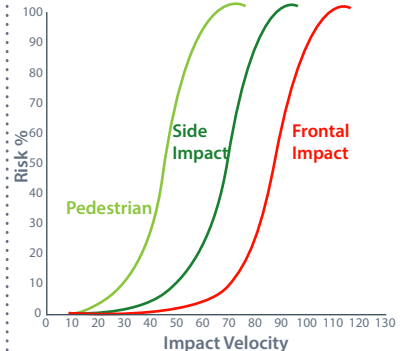

A road trip on a clear 10km stretch of road at 65km/h only saves you 46 seconds vs. traveling at the speed limit of 60km.

The faster you go, the bigger the mess:
