

Facts

COVID-normal conditions require everyone to maintain hygiene as a priority. To keep all users safe, vehicles require special measures to reduce contagion risk.

During this time an increase in mental illness reports of anxiety and depression, has been recorded.

Distraction or inattention accounts for approximately 1 in 4 vehicle crashes.

Prevention Strategies

Disinfect often

Avoid distractions

Do not use your phone while driving

Carry hand sanitiser & facemasks

Don't get emotional

Double-check your thoughts; don't go autopilot

Open windows to improve ventilation

Driving in COVID-Normal Conditions

staying safe on the road starts inside your vehicle

keeping it safe inside your vehicle
